Trump Election Rigging Prevention (TERP)

Task Force

Action Manual

Trump is trying to Steal the Midterm Elections!
Let's mobilize to PREVENT him from doing that.

Convener: Hari Lamba

Group: TERP Patriots

The Center for American Progress (CAP) has described Fifteen (15) action areas where Trump is trying to rig the midterm elections. This is the Full Report, the third in a series).

https://www.americanprogress.org/article/the-trump-administration-is-interfering-in-the-2026-midterm-elections-to-entrench-the-imperial-presidency/?shem=aimgspc,

Here is what CAP says about his efforts:

"Despite the administration's actions, the U.S. Constitution provides zero authority for presidents to control elections, even in the case of emergencies. Instead, the founders bestowed that authority to the states, with Congress as a backstop. State officials, Congress, courts, civil society, and individual citizens across the ideological spectrum must defend people's constitutional rights and prevent democratic backsliding without regard to partisan outcomes. Free and fair elections have guided this nation through the Civil War, two world wars, a pandemic, and natural disasters. Through sustained vigilance, they will chart the nation's course in November and beyond."

TERP Patriots are organizing among all the parties and groups opposed to Trump and the extreme right. Here is the Action Strategy that we are

proposing to counter his efforts in each of these 15 areas.

The administration's fifteen (15) Tactics and our strategies to neutralize them are as Follows:

1. Casting doubt on election integrity via disinformation to justify nationalizing elections
    - We will engage in a counter media campaign to show that the US election system is sound and that there has been no rigging or "election stealing" in the past.
2. Weaponizing the federal government by installing election deniers in key government positions
    - We will expose these people and show that they are engaging in falsehoods.
3. Gutting key agencies and essential election security programs
    - Highlight Trump's actions in gutting ESA (Election Assistance Commission) and CISA (Cybersecurity and Infrastructure Security Agency) and expose his damaging actions so he can rig the elections.
4. Weaponizing federal databases and demanding personal voter information from states to track or purge voters
    - This weaponizing is illegal and as per CAP, Trump and the Federal Government have NO AUTHORITY TO DEMAND ANY SUCH ACTIONS – THE STATES HAVE TOTAL ELECTION AUTHITY.
5. Issuing unconstitutional executive orders to limit voting access
    - These are UNCONSTITUTIONAL ACTIONS and Trump has NO AUTHORITY TO ISSUE SUCH EXECUTIEVE ORDERS – THEY ARE AUTOIMATICALLY NULL AND VOID.
6. Pressuring Congress to pass legislation that would suppress eligible voters
    - The so-called SAVE (Safeguard American Voter Eligibility) Act is an illegitimate action that will require voters to provide proof of citizenship before they can vote. As per CAP's analysis this will mean that more than 140 million voters will not be able to vote. This Bill is unconstitutional, does anything BUT Safeguard voting) and it must be defeated in the Senate.
7. Curtailing voting by mail

- Even though the Supreme Court gutted the Voting Rights Act, it at least voted against banning voting by mail-in ballots. All military personnel based overseas or on ships rely on mail-in voting to vote.

8. Preventing states from using voting equipment
    - Fraudulent claims by Fox News and Newsmax were settled by defamation lawsuits in which they had to pay $854 million in damages to Dominion Voting Systems. We will fight any unconstitutional efforts by federal authorities or the US military to seize any voting equipment and ballot boxes. The Federal government has no such authority.
9. Diluting voters' power through a mid-decade gerrymandering crisis
    - Gerrymandering strategies were initiated with Trump's encouragement in Texas, which led to a backlash in states such as California. These are totally undemocratic efforts that enable candidates to choose their voters instead of the other way around. But we are fighting and we have a good probability of defeating even extreme right candidates in formerly "red" or Republican districts.
10. Using the departments of Justice and Homeland Security to intimidate election administrators
    - The DOJ and DHS actions in this regard are totally illegal, and we the people will not allow election administrators to be intimidated. Social media campaigns and lawsuits are being used to thwart this.
11. Seizing election-related materials and voting equipment
    - We will fight any unconstitutional efforts by federal authorities or the US military to seize any voting equipment and ballot boxes. The Federal government has no such authority.
12. Deploying the military to interfere with the election
    - The US military has a duty to abide by the constitution and must not be used to interfere in the election process. Military personnel must not be called upon any election related duties or show up anywhere near voting sites.
13. Deploying federal agents to interfere with the election
    - Federal and ICE agents must be nowhere near voting sites. Mail-in ballots and use of ballot drop boxes will be increasingly

used so voters do not have to show up in person. Early voting has already started in many states and is being encouraged.

14. Declaring a national emergency to take over or postpone elections
    - It is likely that when Trump sees that his efforts in favor of the Republican party are failing, that he will declare a National Emergency and use this as an excuse to try and cancel the midterm elections. For this we are preparing a mass mobilization, should he do this.
15. Interfering with issuance of state election certificates or pressuring the U.S. Senate or House of Representatives to block seating of duly elected members
    - All Federal announcements nullifying election results are illegal and will not be accepted. Only legitimate state and county authorities have the authority to certify elections. The Speaker of the House has no authority to not seat duly elected members of Congress.

Any actions relating to Tactics 11-15 will be met with mass mobilization and illegal Federal interference will not be accepted. Any attempt by Trump to encourage January 6 type rallies will be countered by rallies organized by the opposition that we will support.

TERP Patriots are organizing the major parties, opposition groups and legal agencies. Parties include the Democratic, Forward and Green parties. Opposition groups include the Indivisible, Our Revolution, Progressive Democrats of America, Women's March, Move On, Black Lives Matter, Color of Change, NAACP, Gun control organizations, American Indian Movement, anti-ICE groups and climate related organizations. Efforts are being made to coordinate with fired federal workers, former military officers, fired FBI and DOJ personnel, and fired Election officials. Legal agencies include ACLU, and SPLC (Sothern Poverty Law Center).

Indivisible is running election training protection trainings in North Carolina, along the 500-mile march route of Common Defense veteran's action. Then training will move to Oklahoma and Texas. TERP Patriots are learning from such actions and will be conducting such training in other parts of the country. TERP will make this the theme of No-Kings and Women's March rallies that it is organizing.

NATIONAL CONVENOR OF TERP PATRIOTS

Hari Lamba, California Hlamba101@gmail.com

Contact me by email to get my phone number and to join our efforts or coordinate with us. NOTE: This website is being used until TERP develops its own website. This Action Manual and 2 other documents are posted at this location for you to download.
